Title (description) Installation of 64-bit IMSL library on SPRE1SGI							
Documents Affected			Source Nos (RID, N Tech Reference	ICR, Action It	em, GSFC (CCR, et	c.) or
RTM Change Start New Baseline							
Problem ECS is required to support 64-bit processing on the PDPS science processors. This also means Instrument developers at SCFs requires copies of the library. The IMSL 64-bit library is available in-house, The configuration scripts must be modified prior to installation and the library checked. This must be done before the library can be made available to SCFs and the PDPS.							
Proposed Solution Install IMSL on SPRE1SGI for checkout. Tar modified install scripts and library and put on ftp site.							
Note: Contacts are Marek Chmielowski and Linwood Moses (EDS)
